Art Unit: 1761

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a method of marking food, classified in class 426, subclass 383.
- II. Claims 6 and 7, drawn to a marked food item, classified in class 426, subclass 87.

The inventions are independent or distinct, each from the other because:

The product as claimed in Group II can be made by methods other than that recited in Group I. For example, the product of Group II could be marked by hand held branding equipment, which would not be electronically and remotely preprogrammed on a PLC.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination purposes as indicated is proper.

In addition, this application contains claims directed to the following patentably distinct species:

Species I, wherein the marking is by a hyper heated head.

Species II, wherein the marking is by laser printing.

Applicant is required to elect either Group I or Group II and, under 35 U.S.C. 121, to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

Art Unit: 1761

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
